ELEGANCE

Detail : "Elegance" window unit adorned with molding

The Elegance Window features distinctive lines that are both refined and elegant.

The exterior is made of aluminum and coated with an baked-on ultra durable polyester powder paint for minimum window maintenance. On the exterior frame, brick-like mouldings enhance the window frame and can also be used to adapt to an existing opening.

The interior is finished in premium quality wood. The wood is carefully selected and all exposed interior surfaces are free of holes and fissures, all attachments being hidden. All the interior is solid wood with chamfering and moulding. The interior treatment can be stained or painted. The most popular fine woods used are pine, maple, wild cherry, oak, cherry and mahogany.
